

A.C.T. HERPETOLOGICAL ASSOCIATION

1986

The next meeting of the ACT Herpetological Association will be on Thursday 29th of May. The business meeting will start at 7 pm sharp and the general meeting and talk will start at 7.30 pm. The earlier starting time is an arrangement to suit those members who live in the country and want to go to the meeting from work.

The talk at the next meeting is by Ken Thomas. Ken will show slides of the frogs of Kakadu National Park.

Future talks

Michael Lau has just had a book published with two other authors on the herpetofauna of Hong Kong. At our June meeting Michael will show slides of Hong Kongs remarkable reptiles and amphibians, and tell us a little about the state of herpetology and fauna conservation in that country.

Later in the year we will have talks by John Wombey and Dick Barwick. *Mark Schuster*

Data sheets

A reminder to bring in any completed field data sheets from last year so that they can be put on disc.
